

## Visualization as a Service

### SOLUTION SHEET

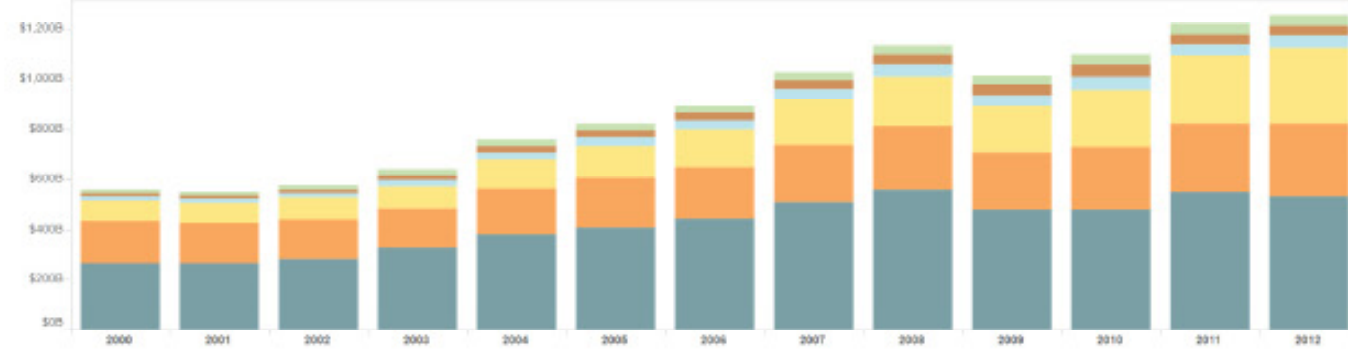

Making your data speak in a way that everyone understands!

Visualization as a Service (VaaS) makes Business Intelligence easier and faster. VaaS is a powerful analytics technology that is designed to help you visualize your data. An effortless drag and drop interface makes it simple for anyone to explore your data and extract the answers they need to make informed decisions.

IMAGINE WHAT YOUR DATA COULD BE

### International Tourism

Tourism Income by Region

Year Range: 2000 - 2012

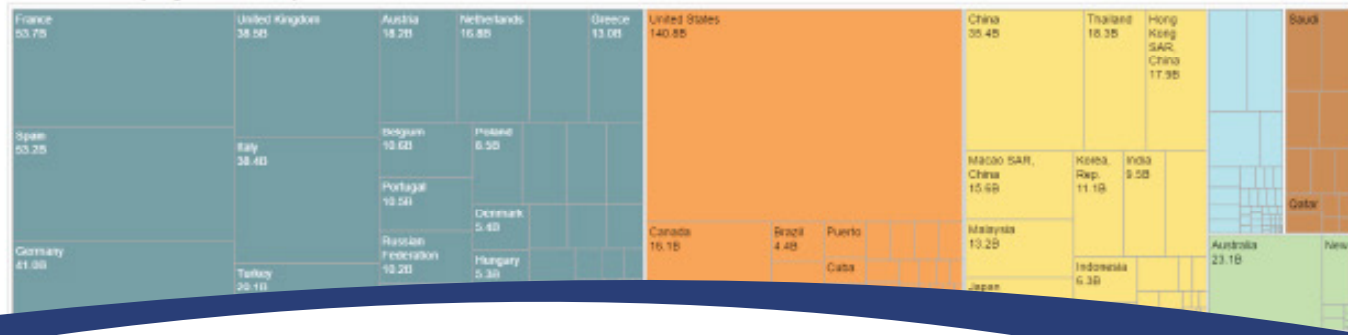

Select Region:

- (All)
- Africa
- Asia
- Europe
- Middle East
- Oceania
- The Americas

Region Legend:

- Oceania
- Middle East
- Africa
- Asia
- The Americas

Tourism Income by Region and Country

#### Skip the servers and software installs:

A low, monthly fee to use VaaS gives you immediate access to enterprise Business Intelligence without the headaches of technology deployment and maintenance.

#### Explore your data and find answers from anywhere:

View dashboards from the office, at home, or while remote using your mobile device.

#### Stay secure!

Keeping your data secure is our top priority. Our expert team works around the clock to keep your data secure, while you focus on your business.

#### Stay informed:

Get critical Business Intelligence about your operations delivered in real-time to your email inbox by subscribing to personalized dashboards.

#### Share with partners, staff, and constituents:

Share dashboards and data securely with your extended team.

#### Business Intelligence - easy:

VaaS makes it easy to access your data and make informed decisions

As a company and as individuals, Taborda values balance, commitment, community, excellence, fun, and integrity.
