

Blackboard Learning Management System

The Next Generation Digital Learning Environment for State and Local Government

Create a central repository for all employee training information, including compliance tracking for mandated training; professional development opportunities for employees; and departmental training workflows.

Taborda and Blackboard's LMS service offering provides State and local governments a solution that provides more than a standard learning management system. This VHSS offering will provide the government and the public with the benefits of a connected learning and training experience, data-driven insights, and flexible solutions resulting in an improved employee training experience, long-term cost savings, increased convenience, and a reduction in overall training costs.

FEATURES

Compliance & Certification

Compliance and certification training is an essential part of learning. This LMS solution can help you move beyond check-box compliance training to true compliance learning.

Employee Experience

Helping employees grow is the best way to retain and reward them. The engaging, intuitive learning platforms allow you to provide your staff the opportunity to learn virtually anywhere, anytime and on any device.

Leadership Development

Successful departments invest in leader development—and they are rewarded with increased adaptability, more effective customer engagement, and higher levels of innovation. This digital learning environment will help departments retain and grow their top talent through more efficient training and collaboration.

Departmental Training

We understand the diverse ways your staff learns—from onboarding new hires to empowering more seasoned employees with leadership competencies. Taborda and Blackboard's LMS solution will help government clients provide today's diverse employees and learners with flexible professional development, training, and online learning that they need to be successful.

Our products below include services to help ensure your success. Our consultants will meet with your team to gain a deep understanding of department goals, so we can provide you with a comprehensive implementation plan for the successful launch of your training programs in the Blackboard environment. This process of planning and implementation is critical to ensuring that distance learning programs on the Blackboard platform are effectively designed, well maintained, and that they meet the requirements of all key stakeholders.

Registration and Management (Genius)

The registration and management offering provides fully integrated learner registration, self-regulated tracking, ecommerce, and enterprise reporting systems and tools. Administrators and trainers can easily see learners' progress towards certifications and view a learners' full course history, including courses taken outside of the organization.

Learning Professional SAAS Advantage (Learn)

The simple, yet powerful learning platform allows your team to easily build a training program that can be delivered and consumed by any learner at their convenience. Create a simple, learner-centric training environment that lowers travel costs, improves employee or partner certifications, increases engagement, and can effectively measure training programs and their impact on business and mission objectives.

Collaborate Web Conferencing (Virtual Training Room)

Collaborate provides a virtual classroom to conduct virtual training, webinars, meetings, and more. Blackboard Collaborate is the only collaboration solution designed specifically for learning, that can support a wide spectrum of collaboration, enabling organizations, employees, and training professionals to communicate, interact, and truly engage with each other.

Blackboard Ally for Learn (Accessibility Component)

Ally is a revolutionary product that focuses on making digital course content more accessible. Using inclusivity, sustainability and automation as its key pillars, Blackboard Ally helps you understand and tackle accessibility in a way that benefits all employees and learners.

Training (Workflow)

TRAIN is a workflow automation system that helps organizations manage, approve and track employee training from the initial request to payment, including the generation of state approved training request forms. Automated routing, one click approval, and auto-generated reminders have simplified the process for managers and employees alike, plus the built-in audit trail and dashboard gives management the visibility to track requests at each stage in the process. TRAIN can be used as a stand-alone solution or integrated with the more comprehensive Blackboard offerings.

The Taborda and Blackboard solution quickly and easily integrates with other business systems and has more than 850 Building Blocks (APIs) in production for extending learning capabilities.
